

Your invitation to attend a seminar...

Borrowing to invest is a strategy used for centuries to enhance your wealth. Unfortunately this was never available within superannuation funds.

The Tax Office however has recently approved this strategy for Self Managed Superannuation Funds.

As a result, you are now able to use borrowed funds to purchase shares, property etc. in a tax effective environment. Holding your assets within superannuation also allows you to reduce or eliminate Capital Gains Tax upon the sale of the asset.

Attend this seminar and learn more about achieving your SMSF investment goals.

Speakers

Scott Maroske
